

# SUPERABRASIVE

**NEW!**

## GRIZZLY BLADE

**DESIGNED TO CLEAN OUT EXISTING CONTROL JOINTS BEFORE FILLING**

Repairing damaged joints is a must before polishing a concrete floor - this will ensure a better looking floor, and decrease the risk of the joint edges chipping or spalling in the future.

- **FAST AND EFFICIENT REMOVAL OF FAILING OR DETERIORATED EPOXY, POLYUREA, OR POLYURETHANE JOINT FILLERS**
- **STRAIGHT, CLEAN CUT WITH ONE PASS**
- **NO CHIPPING OF JOINT WALLS**
- **IMPROVED ADHERENCE OF JOINT FILLERS**

Item #GRZ7
