200-400
REFINE
honing

Remove light scratches and orange peel, discoloration, stains, efflorescence. Prep for polishing steps. Matt finish.

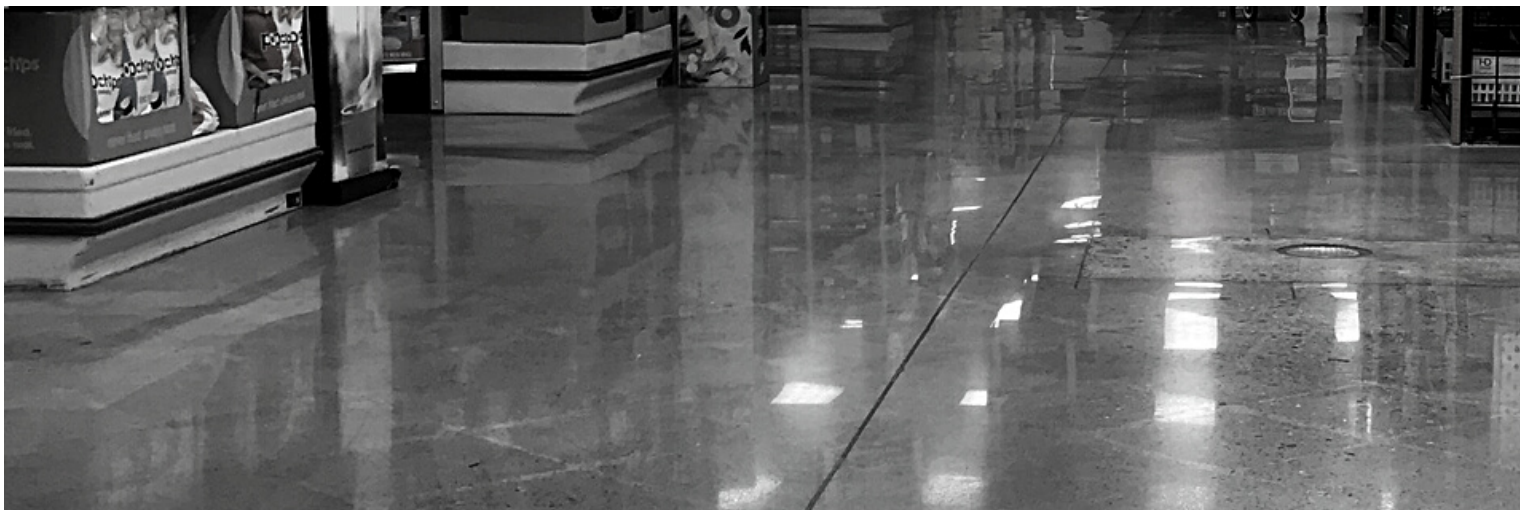

800-1800
POLISH

Use on smooth and polished floors that have lost shine. Can be also used for monthly maintenance to restore / improve shine.

3000-8000
POLISH
MAX. DOI

Maximize gloss DOI on floors in good condition.

SIMPLE, COST-EFFECTIVE, SUSTAINABLE FLOOR CARE

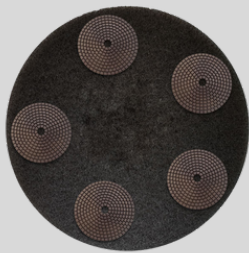

SUPRASHINE HYBRIDS

light grinding and polishing with water

READY.

Attach the Hybrids to a floor maintenance pad (spaced evenly apart).

SET.

Use with **low-speed** machines – scrubbers for best results.

Recommended min. pressure:

40-45 kg / 90-100 lbs.

Use with **water**, making 3-4 passes.

A densifier may be needed on some concrete floors.

GO.

1. Sweep the floor.
2. Start machine with a slow steady speed in one direction.
3. After each pass, next pass should be in the opposite direction – make 3-4 passes, and overlap 1-2".
4. Autoscrub between each step.
5. Inspect the floor to ensure even cut.

ADVANTAGES

- A true hybrid bond that will improve gloss DOI and last longer compared to competition
- Expand your business by adding floor restoration & gloss upgrade services
- Minimum investment with no special equipment needed
- No need to hire specialized labor
- Easy to install - the 5" pads with inverse velcro are easily attached to any maintenance pad.
- Very low cost per square meter.

PROCESS

Inspect floor to determine service level needed:

FLOOR HAS
DEEP SCRATCHES
AND ORANGE PEEL

Start with Hybrids 50 or 100.
Continue up to desired grit.

FLOOR HAS
LIGHT SCRATCHES
AND ORANGE PEEL

Use Hybrids 200 or 400.
Continue up to desired grit.

FLOOR IS SMOOTH
BUT HAS NO SHINE

Use Hybrids 800 – 8000
